VOIP Telephone System

Dan,

It has now been a few weeks since you installed our new telephone system.

What a difference!

First of all ... it works great. With very little instruction, we have found the system to be extremely user friendly. Once I became familiar with the many features (voice mail, forwarding to e-mail, and call history, to name a few) I wonder how we ever got along without it.

I guess the easiest way to explain the switch to this system would be comparing it to the advent of the cell phone. We were a little reluctant to accept the changes at first, but now embrace the new technology. The features and convenience make everything "click" ... and have quickly become second nature.

Thank you for your attention to detail. When our installation required some additional components, your crew was right there for us.

MDC (sic BlackBuck Communications) went above and beyond to facilitate our installation and transition.

Seamless. Excellent work. HAPPY customer.

Sincerely,
Darrin Jacobs
